POWER TRANSMISSION:

CHAIN TO BELT

DRIVEN BY POSSIBILITY™

THE BENEFITS OF DITCHING CHAIN:

CHAIN TO BELT: INDUSTRIAL ENGINEERED SOLUTIONS

GATES DELIVERS MODERN TECHNOLOGY TO SOLVE CHALLENGES OF TRADITIONAL METHODS

Gates believes in innovation and keeping our customers at the forefront of everything we do. That's what Chain to Belt program is all about. Chain systems require constant maintenance, unsanitary oil baths, and can cause long, costly downtimes when they fail. Converting chain drive systems to a Gates belt drive solution eliminates those concerns. There is no lubrication or tensioning required which saves your people time and energy, while lasting three times as long as traditional chain and weighing 97% less on average. The end result is a system that will easily pay for the cost to upgrade in six to twelve months.

BREADTH OF PORTFOLIO

CREATING SYSTEM SOLUTIONS that address today's industrial challenges, including Synchronous Belts, Thermoplastic Polyurethane (TPU), V-Belts, and metals.

MATERIALS SCIENCE INNOVATION

POWER TRANSMISSION SOLUTIONS

delivering improved safety, reliability and productivity through advanced materials science technologies.

COVERAGE & SUPPORT

GATES INFRASTRUCTURE

supports customers every step of the way, through extensive distribution networks, technical application engineers, and technical sales support.

DRIVEN BY POSSIBILITY™

POLY CHAIN®

THE GATES BELT-DRIVE-SOLUTIONS

- 3x Longer Life
- Requires no lubrication
- Virtually maintenance free, with no re-tensioning required
- Significantly reduced weight and noise
- Carbon tensile cord does not stretch
- Belt sprockets good for 2 to 3 belt changes
- Increased uptime
- No crane rental to replace the belt
- Increased safety
- Can reach virtually any center distance

THE BENEFITS EASILY PAY FOR THE COST TO UPGRADE,
PAYBACK PERIOD IN 6-12 MONTHS

- Chart indicates Poly Chain GT Carbon belt widths and roller chain sizes with equivalent power ratings
- Not to be used for drive design purposes.

POLY CHAIN PORTFOLIO

LENGTHS AVAILABLE	UP TO 65.6 FT (PITCH DEPENDENT)
PITCHES AVAILABLE	5MM, 8MM, 14MM, 19MM
WIDTHS AVAILABLE	9MM TO 300MM
TEMPERATURE RANGE	-65F TO +185F
CONSTRUCTION	CARBON TENSILE CORDS; TRULY ENDLESS
OTHER FEATURES	HIGH-MODULUS CORD WHICH ALLOWS USE OF BACKSIDE IDLER

POLY CHAIN® EXTENDED LENGTH™

Gates' innovative carbon tensile technology and extended length polyurethane belting ability enables asphalt manufacturers to have higher uptime, lower maintenance, multiyear solution longevity, and greatly reduced multi-year operating costs.

POLY CHAIN® ADV™

Higher power than you've reached before. Narrower drives than ever before. Poly Chain ADV™ is designed for significantly reduced weight and maintenance in your high-torque applications with limited space constraints.

POLY CHAIN® CARBON™ VOLT®

Suitable for high torque, low speed drives and environments with explosive atmospheres, Poly Chain® Carbon™ Volt® is Static conductive to ISO 9563 throughout the lifetime of the belt.

GATES TPU:

THERMOPLASTIC

POLYURETHANE

WHY TPU?

Polyurethane is extremely wear and fatigue resistant and at the same time highly flexible. TPU is abrasion- and chemical-resistant.

TPU belts replace engineered chain, plastic modular chain, steel cable, ball screw systems, and more. In all of these applications, TPU offers clean and quiet performance, easier cleaning, incredible strength, and absolute precision. And, like all Gates belt solutions, no lubrication is ever required.

INDUSTRIAL SEGMENTS	APPLICATIONS + SOLUTIONS
MATERIAL HANDLING	<ul style="list-style-type: none"> Intralogistics Applications: Automated miniload warehouses, stacker cranes, shuttle systems, and intralogistic conveying systems Lifting Applications: Material lift, automotive lift, scissor tables, and process cranes
AUTOMATION	<ul style="list-style-type: none"> Indexing & Conveying: Displacing attachment chain, welded linear belts with and without profiles Linear Positioning: Open-ended linear belts for positioning and lifting
HEALTH SCIENCE	<ul style="list-style-type: none"> Hygienic Applications: Welded linear and wide belts displacing lightweight flat belts (friction drives) Fitness & Healthcare Applications: Flat belts displacing cable
FOOD PROCESSING	<ul style="list-style-type: none"> Food Conveyor Belting: Replacing attachment chain and plastic modular belting

PRODUCT LINE		CONSTRUCTION	OFFERING	APPLICATIONS
LINEAR BELTS		Open Ended & Welded	Various Pitch, Cord Type, Resins, and Coatings Available	Linear Actuation, Lifting, Material Handling, Conveying
WIDE BELTS		Welded	Various Pitches, Kevlar Cord, Widths up to 450mm	Process Conveying, Hygiene, Tire
FLAT BELTS		Open Ended	Kevlar or Steel Cord in Most	Material Lifts, Live Roller Drives, General Conveying
FLEX BELTS		Truly Endless	Various Pitch, Steel Cord, 1.5 – 22.5m Lengths	Light Power Transmission, High Load Motion Ctrl. (Longer Lengths)
SLEEVES		Truly Endless	Various Pitch, Steel Cord, .12 – 2.25m	Light Power Transmission, High Performance Conveying (Short Lengths)
FOOD BELTS		Welded	PosiClean®, CenterClean™, FlatClean™, Kevlar Cord, Various Fabrication, Joining Options, & Certifications	Food Handling and Conveying

SYSTEM SOLUTIONS:

MACHINEWORKS: CUSTOM METALS

GATES DRIVE EXPERTS GET YOU UP AND RUNNING IN NO TIME. ANY DESIGN, ANY MATERIAL, AND NO MINIMUMS.

SATISFIED CUSTOMERS:

CONTINENTAL PAVING

Continental Paving has been in business for 40 years and is always looking for ways to improve what they do.

“Back in the 80’s if you put down five to seven hundred tons a day, it would be a great day. Today, our goal is twenty five hundred a day. Then we get on some projects and we put down as much as thirty five hundred to four thousand tons a day” notes Mark Charbonneau, the president of Continental Paving. “Downtime is extremely expensive and one of the biggest problems is that you have 30 trucks with 10-man paving crews. If any one thing goes down, then it shuts the whole operation down. So it is important to have products that are sustainable and give you the most efficiency and long life.” Replacing the chain system helped resolve very time consuming and tedious maintenance, which frees up Continental Paving to be more efficient. “The solution was the 19 mm pitch Poly Chain belt. They installed it almost two years ago and it’s been working flawlessly. It’s exciting to have this kind of technology and this horsepower behind me.”

“THEY INSTALLED IT ALMOST TWO YEARS AGO AND IT’S BEEN WORKING FLAWLESSLY. IT’S EXCITING TO HAVE THIS KIND OF TECHNOLOGY AND THIS HORSEPOWER BEHIND ME.”

CHANGEOVER PROCESS

Gates field engineers perform an onsite application survey to get measurements and application requirements.

Gates engineers use proprietary software to generate a bill of materials.

Quote and ROI proposal is delivered to the customer.

Customer commits to order, and schedules future install.

Installation is performed by onsite staff or Gates installation partners.

Gates provides tools and support to keep you running long into the future.

“NOW OUR BANDS RUN EXACTLY HOW THEY ARE SUPPOSED TO BE, BUT BETTER. ... WE DON’T HAVE A GUY POURING OIL ON IT AND NEVER HAVE TO RETENSION IT.”

CULP LUMBER TESTIMONIAL

One belt doing what many chains used to do.

Culp Lumber is a fifth-generation family-owned business. We interviewed Charlie Smith, the Maintenance Manager for Culp Lumber, after they switched from chain drives to Poly Chain systems throughout the entire mill. “We were having lots of trouble with our band mills. We were going through two to three sets a year, at two, three, four thousand [dollars] a set.” Culp Lumber was using wide, cumbersome chain before Gates replaced it with Poly Chain. “We put a little 2 ½ inch wide belt on there and put 150 horsepower and I really didn’t have much confidence in it. Five years later it’s still running.”

DRIVEN BY POSSIBILITY™

CORPORATE OVERVIEW:

GATES IS THERE

AT PLAY

POWERING INDOOR AND OUTDOOR PLAY, FROM THE MOST EXTREME TO THE MORE FAMILIAR.

IN MOTION

PROVIDING AN EXTENSIVE RANGE OF HIGH-PERFORMANCE TRANSMISSION SOLUTIONS FOR ORIGINAL EQUIPMENT AND REPLACEMENT APPLICATIONS.

AT HOME

MAKING EVERYDAY HOME LIFE EASIER AND MORE EFFICIENT THROUGH A BROAD RANGE OF PRODUCTS AND SOLUTIONS.

IN THE FACTORY

DELIVERING SPECIALIZED INDUSTRY SOLUTIONS THAT ENABLE SUPERIOR MANUFACTURING AND AUTOMATION WHEN AND WHERE QUALITY MATTERS MOST.

IN THE FIELD

DEVELOPING ADVANCED TECHNOLOGY THAT POWERS EVERYTHING FROM CONSTRUCTION EQUIPMENT TO WINDMILLS.
