

Declaration regarding REACH Regulation (EC) No 1907/2006 and the Waste Framework Directive (EC) No 2008/98 and 2018/851 (SCIP/SVHC)

REACH is the regulation on Registration, Evaluation, Authorization and Restriction of Chemicals.

SCIP is the database for information on Substances of Concern In articles as such or in complex Products established under the Waste Framework Directive (WFD). All Substances of Very High Concern (SVHC) in a concentration above 0,1 % w/w must be registered in the SCIP database.

Teknikprodukter Nordic AB does handle and sell products which are articles in the sense of REACH. The REACH regulation primarily concerns chemical substances and preparations of chemical substances.

According to the REACH guidelines we are not subject to the registration requirement because our articles do not intentionally release substances under normal and predictable conditions, REACH Article 7.1.

In our own interest and to assure high delivery reliability we intensively pursue the implementation of REACH and all resulting requirements. The products we offer are mainly common standard products which are sold in large quantities. Against this background many of our suppliers signalized the fact that if necessary, the required preregistration or registration of the raw materials will be carried out.

Regarding our duty to supply information according to Article 33 of the REACH regulation Teknikprodukter Nordic AB is obliged to inform our customers in case that articles supplied by us contain Substances of Very High Concern (SVHC) included in the Candidate list in a mass concentration above 0,1% weight by weight.

Teknikprodukter Nordic AB will inform customers separately by e-mail if the products we deliver to them do contain Substances of Very High Concern.

If your company has not received written information from us regarding SVHC and SCIP it means that, to the best of our knowledge, the products your company purchase from us do not contain Substances of Very High Concern (SVHC) included in the Candidate list in a mass concentration above 0,1% weight by weight.

The current candidate list can be found on the website of the European Chemicals Agency: <http://echa.europa.eu/candidate-list-table>

Regarding Article 67 in the REACH regulation and the substances included in Annex XVII, we declare that, to the best of our knowledge, the products your company purchase from us do comply with the regulation.

Reference Candidate List, Annex XIV (Authorization List) and Annex XVII (Restriction List).

Teknikprodukter Nordic AB has a high standard for human health and environmental awareness. The policy of Teknikprodukter Nordic AB is to be fully compliant with all relevant legislation and to work closely with suppliers and customers regarding all sustainability actions. This declaration is part of our policy to keep our customers fully informed about our REACH and WFD commitment.
