

Conflict minerals declaration

On August 22, 2012, the Securities and Exchange Commission (SEC) approved the final rules to implement Section 1502, the conflict minerals reporting obligations, of the U.S. Dodd-Frank Wall Street Reform and Consumer Protection Act. Teknikprodukter Nordic AB is committed to comply with this legislation.

Teknikprodukter Nordic AB does not purchase tin, tantalum, tungsten or gold (3TG) directly from smelters or mines. Based on our purchasing policy, supplier selection process and information received from many of our major suppliers, we have no indication that Teknikprodukter Nordic AB products contain minerals from conflict mines or smelters in and around the Democratic Republic of the Congo. Nevertheless, Teknikprodukter Nordic AB has initiated internal management programs that are aligned with the SEC requirements and the OECD Due Diligence Guidance for Responsible Supply Chains of Minerals from Conflict-Affected and High Risk Areas. We fully understand the importance of this legislation and are diligently working towards our common goal of a socially responsible supply chain.

The policy of Teknikprodukter Nordic AB is to be fully compliant with the conflict minerals rules and to work closely with suppliers and customers. This declaration is part of our policy to keep our customers fully informed about our conflict minerals commitment.
