

REACH Declaration

REACH is the regulation on Registration, Evaluation, Authorization and Restriction of Chemicals.

The Company Teknikprodukter Nordic AB deals with products which are articles in the sense of REACH. The reach regulation primarily concerns chemical substances and preparations of chemical substance.

According to the REACH guidelines we are not subject to the registration requirement because our articles are not intentionally release substances under normal and predictable conditions. (cf.Art. 7 para.1 of REACH regulation).

The products you purchase from us do not have to be registered as they are articles in terms of the REACH regulation.

In our own interest and to assure high delivery reliability we intensively pursue the implementation of REACH and all resulting requirements. So we have contacted our suppliers. The products we offer are mainly common standard products which are sold in large quantities. Against this background many of our suppliers signalized the fact that if necessary the required preregistration or registration of the raw materials will be carried out.

With regard to our duty to supply information acc. Art 33 of the REACH regulation we have to inform our customers in case that articles supplied by us contain substances included in the Candidate list (SVHC) in a mass concentration above 0,1%. After the candidate list has been published we asked all our suppliers for their statements. This examination process is still going on because our suppliers also have to ask their compound suppliers, which have to issue a safety card according to this regulation. Another requirement is not to use substances from annex XVII.

Teknikprodukter Nordic AB has a high standard for human health and environmental awareness, and we declare that all our products comply with the requirements in REACH.

The policy of Teknikprodukter Nordic AB is to be fully compliant with the REACH legislation and to work closely with suppliers and customers. This declaration is part of our policy to keep our customers fully informed about our REACH commitment.
